

MV-Flow™

RS85 Prestige Quick Guide

1. Activate MV-Flow

1 MV-Flow

Tap the [MV-Flow] button on the touch screen to activate the MV-Flow mode.

2 ROI Box

Place the ROI box on the area where you want to observe the vascularity.

3 ROI Position & ROI Size

Adjust the position and size of the ROI box using the [Set], the [Change] button and trackball on the control panel.

4 MV-Flow Gain

Adjust the MV-Flow gain with [Color] dial-button on the control panel.

2. Display mode in MV-Flow™

1 Dual Live

BW and MV-Flow mode are simultaneously displayed in dual mode side by side.

2 Display Mode

It can be switched to the below mode.

- **MV-Flow+BW** : Displays both MV-Flow image and BW image simultaneously.
- **BW Only** : Displays only BW image without MV-Flow image.

3 Flow Mode

- **Power**: Provides sensitivity and resolution suitable for the micro-blood flow observations.
- **Color**: Directional power mode. It mitigates the noise around the micro-blood flow.

3. MV-Flow™ parameters

[Color map]

1 Tissue Suppression

It reduces strong signal from the tissue which appears as hyperechoic signal. The higher index value is, the more noise from the tissue are removed.

2 Filter

It can suppress the flash artifact produced by blood vessel wall movement. The higher index value removes the more flash artifact.

3 Alpha Blending

It can be adjusted the blending ratio between 2D and MV-Flow. The higher index value eliminates the background signal more.

4 Color Map

Select a color map of MV-Flow on user's preference.

4. Vascularity Index in MV-Flow™ (1)

1 Vascularity Index

On the frozen MV-Flow image, Tap the [Vascularity Index] button on the touch screen.

2 VI ROI Type

Select the type of VI ROI among Ellipse, Rectangle and Manual Trace.
(*VI : Vascularity Index)

3 Set VI ROI

Place the VI ROI on the region of interest and press the [Change] button to adjust the size of VI ROI.

4 Reset

Tap the [Reset] on the touch screen to restart drawing a ROI.

4. Vascularity Index in MV-Flow™ (2)

	Power	ROI	Ratio(%)
a Pixels	15015	21763	69.0
b cm ²	5.79	8.40	

1 Result

After the ROI is placed on the region of interest, the result box will come up at the bottom right.

a Pixels

- **Power** : The number of pixels of blood flow within VI (Vascularity Index) ROI
- **ROI** : Total number of pixels in VI ROI

b Area

- **Power** : Area of blood flow within VI ROI
- **ROI** : Area of VI ROI

c Ratio

Ratio of total pixels to the MV-Flow pixels in VI ROI
