

FAQ

What is Temp ID?

[FAQ – Temp ID]

- Question
What is Temp ID?
- Answer
When saving an image on the ultrasound examination screen (scanning mode) without registering a patient, an ID starting with "Temp ID" is automatically assigned, and the image is saved.

To enable it, go to [Setup](#) > [System](#) > [Patient tab](#) and enable [Temp ID](#) by clicking [On](#).
If you want to send images saved with Temp ID to PACS, check [Send DICOM during Exam](#).
