

FAQ
Worklist Search Criteria

[FAQ – Worklist Search Criteria]

- **Situation**
I want to use the **Location** value as a search criterion in the Worklist.
- **Solution**
 - **Path:** Utility > Setup > Connectivity > DICOM tab
 - Select the **Worklist** from the service items.
 - Click **Edit**.
 - Select **Location** under **Scheduled Procedure Step Location**.
 - Enter the desired **Location** value.

* Specify the location of the exams you want to retrieve.
Any: Retrieve exams from all locations. / Location: Retrieve exams from the location entered by the user only.
