## [FAQ – Check Connection Status 2]

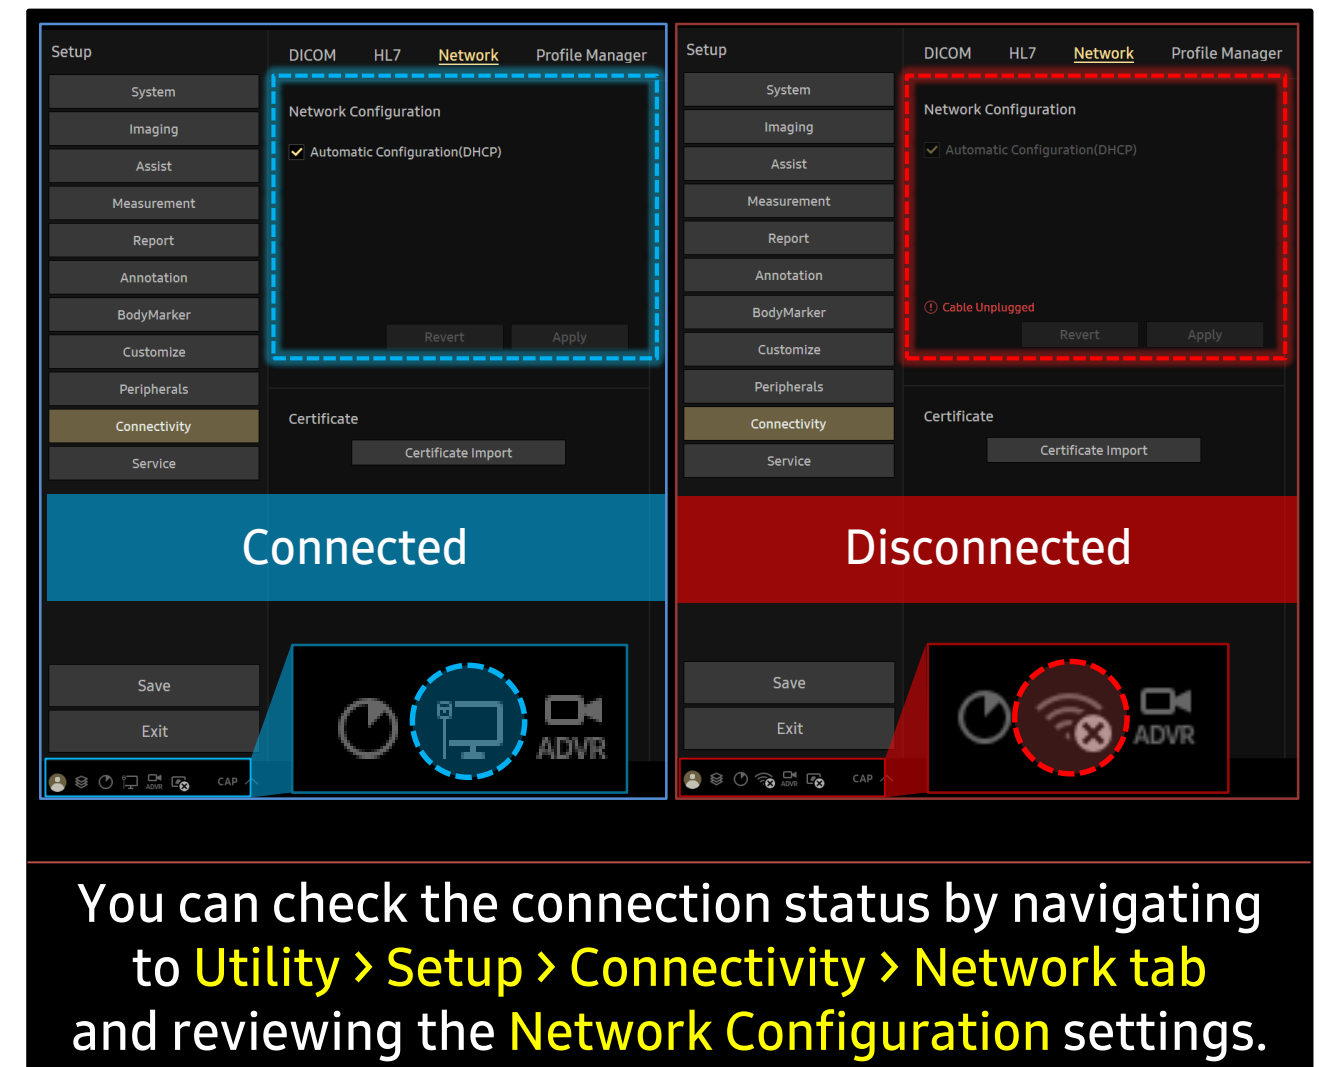

The screenshot shows the Samsung R20 monitor interface. At the top, it displays 'SAMSUNG' and the date '2025-06-04'. Below that, it shows 'Breast / LA2-14A / 4.0cm / 80Hz' and '10:19:51 AM'. The main area shows a technical specification table for a breast scan. At the bottom left, there is a 'Status Information Area' highlighted in yellow. Below this, a callout box shows a 'Wi-Fi Disconnected' icon with a red 'X' over it, and a white arrow points to this icon on the bottom left of the monitor's taskbar.

**Status Information Area**

Wi-Fi Disconnected

You can check the connection status by hovering the cursor over the icon located at the bottom left corner of the monitor.

The two screenshots show the 'Network Configuration' settings in the 'Network' tab. The left screenshot shows the 'Network Configuration' settings with 'Automatic Configuration(DHCP)' checked, and a blue dashed box highlights the 'Network Configuration' section. Below this, a blue banner reads 'Connected'. The right screenshot shows the same settings, but with 'Cable Unplugged' indicated by a red dashed box and a red banner below it reading 'Disconnected'. Both screenshots show the 'Network Configuration' settings with 'Automatic Configuration(DHCP)' checked and 'Revert' and 'Apply' buttons.

**Connected**

**Disconnected**

You can check the connection status by navigating to **Utility > Setup > Connectivity > Network tab** and reviewing the **Network Configuration** settings.
