

FAQ

How to Set Thumbnail Deletion Option

[FAQ – Deleting Thumbnail Images]

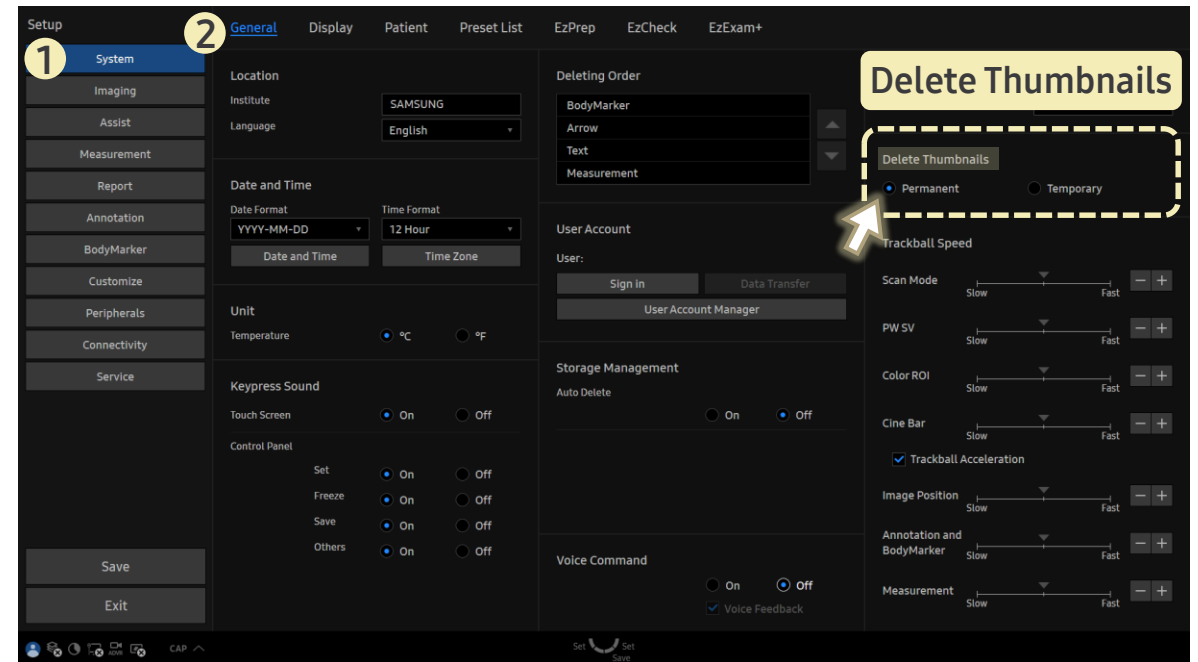

- Question
What happens when I delete thumbnail images? Can I undo the deletion before ending the exam?

- Answer

■ Path: Setup > System > General

Under **Delete Thumbnails**, select one of the following:

- **Permanent:** The thumbnail is deleted immediately.
- **Temporary:** An 'X' appears on the thumbnail; it is deleted when **End Exam** is pressed.
 - ▶ If **Temporary** is selected, deletion can be canceled before ending the exam.

- This applies to thumbnail images shown on the right side of the monitor during scanning or **Exam Review**. (* It does not apply in **SonoView** mode.)
