

## FAQ

# How to Hide Patient Info on Saved, Printed, or PACS Images

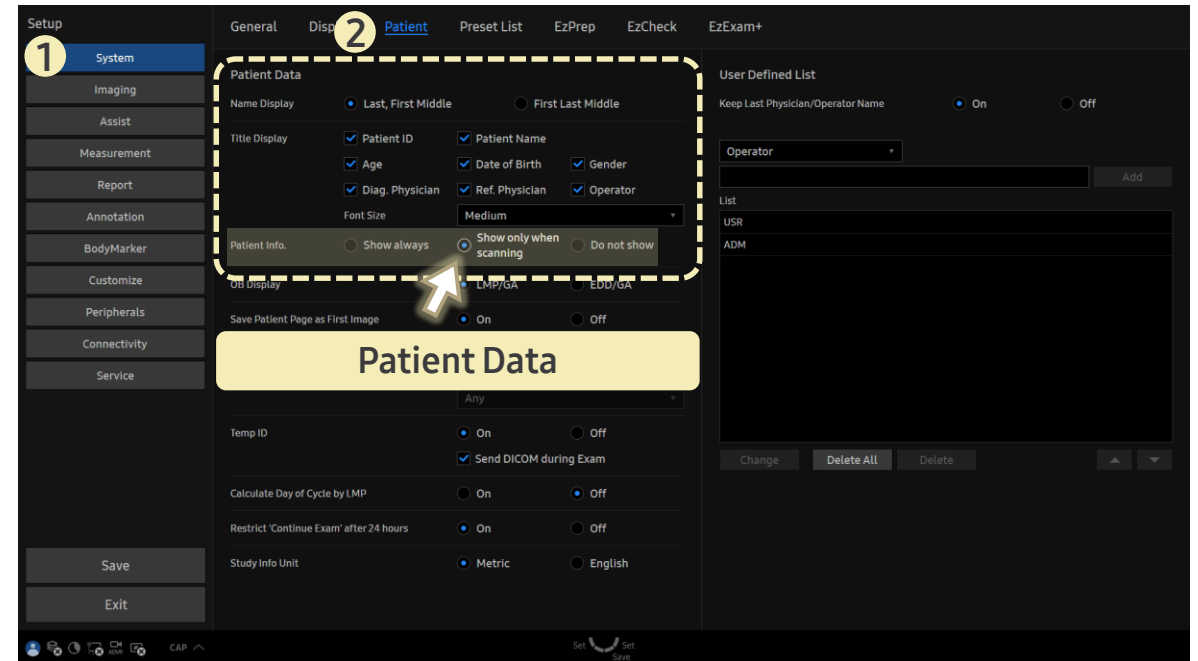

## [FAQ – Patient Information]

- Question  
Can I display **Patient Information** only during scanning and hide it from saved, printed, or PACS-transferred images?

- Answer

■ Path: Setup > System > Patient

1. Go to **Patient Info.** settings under **Patient Data**.
2. Choose **Show only when scanning** from the available options.

- Patient information will be visible during live scanning, but hidden on saved images, printed outputs, and PACS-transferred files.
